**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-13, 75-88, 146 and 179, drawn to systems and method for manufacturing flat panel displays.

Group II, claims 16-31, 35-39, 42, 70-73, 89-113, 115-131 and 147-178, drawn to systems and methods for inspecting objects, and methods for coating the surface of an article.

Group III, claims 74 and 114, drawn to an apparatus and a method for inspecting an article in a clean room.

Group IV, claims 132-145, drawn to an apparatus and a method for automatic optical inspection of generally flat articles.

The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is drawn to systems and method for manufacturing flat panel displays by using manufacturing devices located in a first controlled environment and inspection devices located within a second controlled environment included in the manufacturing devices.

Art Unit: 2879

Group II is drawn to systems and methods for inspecting objects, and methods for coating the surface of an article, by using two illumination configurations and non-scanning sensors for optical inspection.

Group III is drawn to an apparatus and a method for inspecting an article in a clean room, by using at least one non-scanning sensor and a controller for remotely controlling a positioning stage and array of illuminators.

Group IV is drawn to an apparatus and a method for automatic optical inspection of generally flat articles, by using a light beam generator and a sensor positioned with respect to specific orders of diffracted light reflected from the inspected article.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
